

**MARITIME CHAMBER OF COMMERCE  
İSKENDERUN**

**Ref No:** 25/İSK-L-555

**10.04.2025**

**Subject:** Implementation of Cut-Off for Vessel Discharge and Loading Lists

**Dear Business Partners,**

To enhance the efficiency of port and vessel operations, as of **01.07.2025**, the **Final Discharge / Loading / ROB Lists** must be transferred to the Limakport IPROS system **at least two hours before the vessel's arrival** and **All Plans ( Discharge / Loading )** must be submitted to Planning Department.

Additions made to the loading list after the vessel's arrival will not be accepted and transferred to the system. Arrival of the vessels that do not meet the specified conditions may be suspended and/or the berthing order may be changed by Limakport regardless of their Berthing Window status.

Additionally, containers that are scheduled for loading onto the vessel, but which have requested services such as **Inspection or X-Ray** during or after the transfer of the loading list and have not been completed, **will not be included in the vessel loading plan and will be cut-off from the vessel.**

We appreciate and thank you for your co-operation in ensuring **smooth and efficient operations.**

Best Regards,
